SUMMARY

Fullstack-oriented developer with 3+ years of experience building web and mobile applications, internal tools, and automation systems. Proficient in React, React Native, Vue.js, Python, and SQL with hands-on work spanning frontend UI development, REST API construction, database design, and workflow automation. Proven track record of delivering tools that meaningfully reduce manual labor and improve operational efficiency.

TECHNICAL SKILLS

Languages & Tools: Python, JavaScript, SQL, VBA

Frontend: React, React Native, Vue.js, HTML, CSS

Backend & APIs: REST API Development & Consumption

Data & Automation: Excel (Advanced), MS Access, OCR, Data Extraction, VBA

DevOps & Collaboration: Git, GitHub, Branching, Rebasing, Pull Requests, Code Review, CI/CD (dev / staging / prod), Environment Config

Other: Database Design, Debugging & Troubleshooting, Secure Data Handling

PROFESSIONAL EXPERIENCE

Frontend Developer | Employers Outsourcing — Fresno, CA

May 2024 – Present

- Built and maintained web and mobile applications using React, React Native, and Vue.js serving internal company operations
- Developed RESTful API endpoints for a React Native mobile app's reservation and invite system, structuring and transforming response data for accurate display of upcoming user events
- Collaborated via Git across a team environment managing branches, rebasing, pull requests, code reviews, and deployments across dev, staging, and production with proper environment key management
- Built responsive UI components and dynamic interfaces to streamline internal workflows and improve user experience

Data Specialist | Employers Outsourcing — Fresno, CA

December 2022 – May 2024

- Built a Python-based OCR tool to automate PDF data extraction, reducing a team-wide weekly task to a single worker and freeing the rest of the team to focus on claims processing
- Developed an automated check-matching system that processed uploaded spreadsheets against outstanding balances using multi-parameter validation logic achieving ~90% auto-match accuracy and compressing a week of manual work down to a single day
- Designed and maintained Microsoft Access databases with custom forms, queries, and tables to support business operations and reporting
- Automated reporting workflows using Excel and VBA, eliminating repetitive manual data processing across teams
- Assisted in maintaining and improving legacy internal systems and scripts

PROJECTS

Admin Operations Portal · *Vue.js, REST APIs*

- Developed and maintained a web-based admin portal to manage daily business operations including user management, front desk check-in, and scheduling calendar
- Built dynamic UI components and integrated with backend APIs to streamline internal workflows and improve operational efficiency

Financial Management Web App · *Vue.js, REST APIs*

- Contributed to development of a financial platform supporting payroll, claims processing, and audit reporting
- Built file import/export, report generation, and transaction tracking with structured validation logic to ensure data accuracy

Secure SSO Authentication Platform · *Vue.js*

- Assisted in building a secure authentication system with single sign-on (SSO) capabilities and multi-factor verification including email, phone, and identity verification (ID + liveness checks)
- Focused on secure onboarding flows and handling sensitive user data with strong attention to privacy

Exclusive Membership Mobile App · *React Native, REST APIs*

- Developed a React Native mobile application for a private membership service, including construction of API endpoints for pulling reservation and invite data to accurately display upcoming user events
- Built features for user onboarding, subscription payments, reservations, and billing management with a strong focus on security and data integrity

EDUCATION

Google IT Support Professional Certificate

Merit America (Online) · June 2022

Troubleshooting, networking, systems administration, and cloud fundamentals

Coursework toward B.S. Electrical Engineering

CSU Fresno · December 2018

Coursework included programming (C++) and circuit system design
